

# Galleries Galore

## **Canaccord Capital Exploration Gallery**

There's over 5,000 square feet of new animals to explore such as jellies, barnacles, ribboned seadragons and even mosquitoes. Get hands-on with exhibits by churning water in the barnacle habitat or playing with time on spin browsers that allow you to speed up frames or slow them down so you don't miss any of the action!

## **Clownfish Cove**

This popular children's play area, designed for kids eight and younger, has been expanded and gives families even more opportunities to learn and play together. Dress up as your favourite aquatic animal or nurse a 'seal pup' back to health in our new animal hospital. Animals are available for up close encounters in special touch pools.

## **Arctic Canada**

Come face-to-face with curious beluga whales in our underwater gallery. Find out how you can join trainers in the habitat with the belugas, by participating in our unique Beluga Encounters Program. Sleepovers with the whales are also available for groups.

## **Treasures of the BC Coast**

Explore the diversity of life found in the underwater world of British Columbia. Watch as the giant Pacific octopus glides silently from crack to crevasse and discover how all of these awe-inspiring exhibits are connected to geographical locations in BC.

## **Tropic Zone**

Blacktip reef sharks and moray eels are just a few of the animals that call the Tropic Zone home. Colourful fish abound in this gallery highlighting warm water creatures from all over the globe. Daily dive shows and shark feeds (twice weekly) are very popular.

## **Frogs Forever?**

Amphibians survived the disaster that wiped out the dinosaurs—but now they may be in trouble. Find out why at our spectacular new exhibit, Frogs Forever?, which uses the latest sound technology and stunning colour to show the plight of the world's frogs that are rapidly disappearing from the wild.

## **The Wild Coast**

A series of walkways allows visitors to interact with a variety of marine mammals, including Pacific white-sided dolphins, harbour seals, sea otters, and Steller sea lions. Unique shows and experiences feature trainers feeding the always-adorable sea otters, as well as training sessions with the acrobatic dolphins and the boisterous Steller sea lions.

## **Pacific Canada Pavilion**

Featuring a 69,000-gallon (260,000-litres) exhibit highlighting marine life from the Strait of Georgia, visitors come face-to-face with an underwater habitat filled with a vast web of plant and animal life. Divers mingle with thousands of schooling herring, halibut, crabs, kelp, sea stars, and other Pacific fishes.

## **The Amazon Rainforest**

Discover the giant fishes of the Amazon and scan the steamy rainforest jungle for snoozing sloths. Snakes, spiders, birds, and lizards all live in this wondrous gallery. Experience the delight of thousands of free-flying tropical butterflies during the summer months.

## **BC Hydro Salmon Stream Project**

The BC Hydro Salmon Stream Project winds its way from the Aquarium, through Stanley Park and into the waters of Coal Harbour. Salmon returns are anticipated late September – early January each year.
