Careers in Conservation
Ocean Wise Virtual Aquaclass

Ocean Conservation, much like any other industry, thrives when a variety of perspectives, disciplines, and life experiences work together. In this program students will connect with one of our expert educators to learn about the diversity of roles involved in conservation. They will meet a guest speaker from one of the many departments that contribute to the ocean conservation goals of the organization, discover new potential career paths, and gain insight into how an ocean conservation organization runs.

Quick Facts:
- **Technology**: Access to internet, video, and audio connection required.
- **Mentors Expertise**: Engineering, Graphic and Exhibit Design, Food Services, Event Planning, Animal Husbandry, Propagation, and Research.
- **Cost**: $45 per 45 minute program.

Program Objectives
- Recognize and explore diverse perspectives on how work contributes to ocean conservation
- Analyse internal and external factors that inform career-life choices
- Identify skills and strengths that make individuals strong candidates for a variety of positions
- Identify how conservation requires collaboration between disciplines and perspectives to be successful

How to Book:
[Click Here](http://bit.ly/aquaclass) to visit the Virtual Aquaclass page on Vanaqua.org to book your program. Once booked, you will receive a follow-up from the Online Learning Coordinator to specify your topic.
